PROFESSIONAL SUMMARY

Junior Full Stack Web Developer candidate with a completed 300-hour Full Stack Web Development internship at Chimes Consulting. Contributed to a team-developed Sales and Inventory System using Laravel, PHP, React, TypeScript, Inertia.js, and Tailwind CSS. Experienced with frontend and backend development, debugging, and responsive interfaces, using AI coding tools flexibly for code generation, explanation, review, and problem-solving while checking and adapting the output to project needs.

KEY SKILLS

Full Stack Web Development | Laravel | PHP | React | TypeScript | JavaScript | Tailwind CSS | HTML5 / CSS3 | Inertia.js | SQL Databases | Git / GitHub | AI-Assisted Development

PROFESSIONAL EXPERIENCE

Full Stack Web Developer Intern | Chimes Consulting | Jul 18 – Aug 5, 2026

- Completed 300 hours of full stack web development internship training, confirmed by a company-issued certificate.
- Contributed across frontend and backend development activities for a team-built Sales and Inventory System, working with a Laravel, React, TypeScript, Inertia.js, and Tailwind CSS codebase.
- Worked with features and workflows spanning product and inventory records, sales, orders, invoices, and reporting; participated in implementation and debugging activities.

TECHNICAL PROJECTS

Sales and Inventory System | Chimes Consulting Internship

- Team-built web application for sales and stock management with product, customer, order, invoice, supplier, expense, and reporting modules. Stack: Laravel 13, PHP, React 19, TypeScript, Inertia.js, Tailwind CSS 4, SQLite, Vite.

Point of Sale (POS) System | Academic Project

- Developed a basic POS application covering product listings, transaction processing, and sales calculations using Java, HTML, CSS, JavaScript, PHP, and XAMPP.

Student Management System and Portfolio Website | Academic / Personal Projects

- Built a student record manager with add, edit, delete, and search functions; developed a responsive portfolio website to display projects and contact information.

School Laboratory Reservation System | Academic Design Project

- Prepared an implementation plan for school laboratory booking, role-based access, conflict detection, approvals, and database design. Proposed stack: ASP.NET Core MVC, C#, SQL Server; planning/documentation stage.

TECH PROFICIENCY

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Inertia.js | Backend: PHP, Laravel, Java

Databases: SQLite, MySQL (basic) | Tools: VS Code, Git, GitHub, Vite, XAMPP

AI Development Tools: ChatGPT, Google Gemini, OpenAI Codex, Claude | AI Workflows: Prompting, code generation, debugging, review, and validation

Design: Figma, Canva, Photoshop

EDUCATION

Bachelor of Science in Computer Engineering — Undergraduate (Completed Third Year)
Bestlink College of the Philippines | 2022–2025

CERTIFICATIONS & TRAINING

300-Hour Internship Certificate — Chimes Consulting (2026) | Java Programming NC III — TESDA
Full Stack Web Development — Udemy (Course Completion) | Graphic Design Workshop — Sangguniang Kabataan
